## *The Manifesto of the Mother*

The Age of the Mother is upon us.

She returns triumphant from long exile by the heartless. The Heart of Humanity is opening to Her Life Force. She returns supported by the full power of the Deva Evolution.

No longer will her power, the Power of Goodwill, the Power of Creative Intelligence, the Power of the Mother of the World be used by the heartless separatists of darkness to manifest the tortured dungeons and slavery of their dark visions.

Finally, guided by Whole Hearted and Courageous Sisters and Brothers, her power will be used to build the foundations of the new Civilizations and world Cultures: Governments that serve the Common Good, financial systems that circulate the blood of the planet, money, throughout planetary Life, educational systems that liberate the "prisoners of the planet" from bondage, illusion and form identification.

2000 years ago it was heralded by Her Legions of Angels at the Birth of the Heart or, as we call it the Christ, "Peace on Earth Goodwill to men."

The time has come for Humanity to move into its destiny. The time has come to restore the Plan on Earth and welcome the return of the Heart or the Christ to the World. The Planet is being reborn through the Christ/Heart.

This is being accomplished through the restoration of the Balance of Creation. The Intentional Will to Good of the Father, transmitted through the Will to Love of the Son, is moving into manifestation through the "Touchstone that will transform the World", the Goodwill of the Mother.

Our efforts are supported by the Great Lord of the Seventh Ray, The Manipulator of the Wand, The Builder of the Square, The Temple Guardian.

It was foretold. It is happening NOW.

**We will prevail!**

2014 = 7

## The Manifesto of the Mother

For some time now, In the world around Community of those brothers and sisters who are consciously working to enable the Unfolding Restoration of the Great Plan, the sense of expectancy, the feeling that something was coming has been growing more powerful. For example, from a Thoughtline published in February of 1995: *"Something is coming. Something is going to happen. It is hanging out there, pending, like a morning sunrise. You can feel it in the air. It has become an ambiance. Like most of you, my week involves participation with groups of people from all walks of life, race, class, occupation. They are all expecting something to happen. I am finding this air of expectancy just about everywhere."*

***Although many people are rather vague about what the "it" that is coming is, ...everyone agrees that something is coming.***

Although many people are rather vague about what the "it" that is coming is, ...everyone agrees that something is coming.

While not really willing to talk that much about it because of its insubstantial nature many of us have been acutely conscious of this approaching something even long before 1995. But eventually this sense of "impending" became so obviously present that one simply had to speak about it. Since the birth of this century, the

presence of this coming something on the subtle planes has become huge, almost overwhelming. Only the stonehearted, the walking dead do not register it.

During the recent 2012 Cycle, co workers and friends started to try to give a form to the "it". There was/is lots of buzz about extra planetary and systemic help in the form of space ship sightings, the appearance of crop circles, telepathic communications from Arch Angels, high

level dignitaries, and friendly forces of various kinds from other centers of Consciousness within our

Galaxy. It was like Dune, was happening or Daniel Jackson had leaked the Stargate.

None of this was really "new". These forces and friends have always been here helping where they were able to within the limits of Human Free Will. And, always among us there have been those who were aware, those whose consciousness was sufficiently clear and service oriented to be able to register the presence of these "unseen forces". (Unseen by those who could not see them.)

Our science fiction writers have been writing about them for generations We need to remember that over the centuries,

thanks to the strictures of the religious sectors, there was not much that we could actually call science. It was seldom if ever the religious sectors, but our playwrights, novelists, poets, artists, musicians who touch and reveal the Wisdom to us through metaphor. Think of Dante's *Inferno* and *Paradiso*. A better metaphor for the dimensions of Reality from the "Subtle" worlds to the "Fiery World" about which MM speaks does not as yet exist. Today, much of what we call science fiction is a metaphor through which seers such as Frank Herbert, Neil Stephenson, George Lucas, James Cameron are trying to reveal reality to form locked consciousnesses.

Also, we must realize that many of our scientists are well aware of such possibilities. However, everyone recalls Galileo's experience with the Christian priesthood. Today's scientists, having every reason to fear the power of the enforcing "scientific priesthood" of materialistic orthodoxy regarding what is acceptable or "provable", are quite timid about speaking publicly regarding such matters.

At the same time, the omnipresence of energy of this magnitude can and does color the astral plane and generates a significant amount of glamour in the desire/wish life of those who have hope, to say nothing of fear and hysteria of many individuals. The fact that the consciousnesses of our brothers and sisters is mainly emotionally polarized has a profound effect on the free will choices they are making and will, for some time

continue, to make and empower. These choices have a very significant effect on the timing of the Unfolding of the Plan.

Therefore, the pace, shape and level of destruction/reconstruction of the manifestation of what we can clearly see coming, depends greatly on two things. One is the constant and careful shifting of the mass polarization of consciousness from the emotional to the mental dimensions and the systematic destruction/elimination of the gross frequencies of fear, hate, doubt from that dimension. The second and most important is the working to raise the consciousness of the intelligentsia from their form focused fixation to the world of causes, the Real world of energies and thought. Thus our work. Thus our very presence on the planet at this time.

In these days of the presence of such high frequencies, one needs to maintain "constant vigilance" regarding one's own polarization. We need to be very much aware of the practical realities generated by the above facts. And, we need to be quite clear, quite willing to strive for the goals even in the face of the extreme resistance we face. As MM has pointed out.

**"But when the step is firm, the counterforces are beneficial. They generate lightning, and the thunder shakes distant mountains. ... The future is constructed by lightning-bolts of realization. The power of these great sparks depends upon the strength of the counterforce.**

**Clearly then, success will not come from embarking on a voyage in a tub across a stagnant pool. When We say, "Set sail," We mean that you must try the ocean; the grandeur of its waves will give you joy. Does not the testing of one's strength lead to a growth of power? It may seem impossible to cross an abyss, but you have already crossed many an abyss and smiled. You see, I do not speak of fantasies, but of that which has already been tested and for which there are witnesses.**

**Courage comes from knowing one's path."**

Somewhere along in Great Unfolding, most of humanity became overwhelmingly identified with the dimensions of dense form. This resulted in a kind of heartless, mind/brain disease called doubt and disbelief that made it next to impossible to register anything that was not a dense physical form.

So, the work before us is quite clear. The issue is how can we effectively bring the Future, which we can so clearly see, into an acceptable frequency range with which these brothers and sisters can work. This has always been the task of the incarnated worker. Master D.K. has said that "Revelation will come when the world disciples and initiates have perfected the art of revelation." ***The Rays And The Initiations P. 300***

Clear extrapolations and formulations of what we know and can see as the future of

humanity and the planet are great. However, we need to be conscious of the fact that true growth or progress on the Path comes only through experience, not from the consuming of data, thoughtforms, or information. This is why metaphor works as a transmitter of the Real. An individual can actually experience the energy at the soul of the metaphor. Huge, fanciful, sentimental, visionary images of the Golden Age are not very revelatory, and are not going to be very effective in helping these brothers and sisters move into a higher frequency of consciousness.

Fortunately, there were always enough heart-sighted and trained individuals among us that we were still able to move humanity forward although at a much slower rate. This group of heart-sighted individuals has over the past few hundred years grown substantially, and this is a significant factor regarding our approach to and use of the frequency of the something that is coming.

This growing sense of impending has generated a field of enormous tension within the heart-mind of the one Humanity. The size and tension of the receptive field determines the levels of energy that is released for our use and aid. The emerging Something including the recent Shamballa impacts, "lightning-bolts of realization", are/were evocative responses to the growing invocative power of the group of sighted workers.

Somewhere over the years of pondering on the nature of this coming something, I started to realize that I had been expecting

and looking for the appearance of a form. I was looking for a thing, an object, an event a "something" of some sort that I would be able to point at and say "this is it!"

While many things of great import and significance happened none of them seemed to be IT. Then I started to wonder what was driving these events? What was causing them? And interestingly enough, actually it blew my mind, one of those lightening bolts about which MM speaks, I realized that the driving force behind any and all evolutionary expansion is and always has been Goodwill, the energy of Mother of the World.

I have often written about "Goodwill, the energy that will transform the world." And I observed in a *Thoughtline* in 1999, "That the world has not been transformed into a planet of peace after two thousand or so years indicates that we probably don't really understand the true nature of goodwill, that we have not used goodwill, that it is not goodwill which permeates the network of relations we call government, financial, and educational systems which we have created and which enclose humanity in its web."

What came together for me was the relationship between Goodwill and the Mother of the World, that Goodwill was the creative the "feminine" energy of Cosmos. Thus the eons long efforts by the

Retrogressors to diminish, to reduce even to desecrate women.

In a nut shell: Shamballa Impacts or any other energy streams or ideas can move into manifestation only through the Mother of the World, the Third aspect of the Will, Active Intelligence, or Goodwill. Goodwill is the creative impetus for any form whatsoever.

So, it is my present conclusion, as I announced above, in the "Manifesto of the Mother", that the Something that is coming is not a thing, not a specific event or even a series of events. Very much deeper and significant of the Golden Age, what is "coming" or much better, emerging from the subtle spheres into our consciousnesses, what is in fact here now and growing with enormous power through its appropriate use is Goodwill, Creative Intelligence the energy of the Mother of the World.

***What is in fact here now and growing with enormous power through its appropriate use is Goodwill, Creative Intelligence the energy of the Mother of the World.***

In the past 15 years of so, especially since we started the

meditation work on opening the heart of Humanity, this fact has become more and more clear. It has been on its way for a couple for hundred years. That I am just now getting it is an example for me of how we need to discriminate between unfolding events and the energy field that is driving them into manifestation. As we learn to work from the future from causal levels, we will begin to see the chain of cause

and effects and be able to work more specifically on the cause side rather than be reacting to events.

Incidentally, it was not one of the Masters who observed that "With an eye made quiet by the power of harmony and the deep power of joy we see into the heart of things." it was Wordsworth.

Looking over and over at the events of the recent advances on the Path that humanity as a group has made over the past couple of centuries and specifically in the areas of individual human value, interaction, dignity, freedom, inalienable rights, it became quite clear to me that, despite the huge systematic repression of women or anything female that had been going on for eons, the frequency of the Power that was/is behind most of these events has been the creative, sustaining, energy of Goodwill.

Starting with Plato and just dealing with the Western World, I could make a huge list of such events of significance, but to stick to the past 200 years, I will name only a few: The Constitutional Convention of 1787, The Emancipation Proclamation, 1863, Women's suffrage in the United States 1920, The triumph in the 2 part World War 1914-1945, The signing of the U.N. Charter 1945, Penetration of Space, Earth seen from space for the first time,

1960ties, Computers, The election of Barak Obama.

Upon close consideration, it is clear that these events, points of significant revelation and creative power, were all driven by the energy and power of Goodwill. Looking at this progression from strictly an energy point of view, Goodwill is the creative energy of Cosmos. It is obvious that only humans with a female body can give birth to children; however, regardless of the gender of the individual

***Goodwill is the energy which emerges as the end result of Cosmic Intention moving through the Will to Good into the Will to Love and then through Goodwill into manifestation.***

doing the creating, it is the creative energy of Goodwill that drives creation of any kind: art,

poetry, music, true science, architecture and the creation and birthing of children. Goodwill is what emerges as the end result of Cosmic Intention moving through the Will to Good into the Will to Love and then through Goodwill into manifestation.

How the eternally existing Cosmic energy of Intentional, Principled, Impulsive Will came to be called Father/masculine, and the eternally existing Cosmic energy of Creative, Sustaining, Nourishing Will came to be called Mother/feminine probably has to do with the need of the then Guides of the Planet's evolution to use metaphor to explain to pre-mental Humanity where things like people, sunshine, lightening, rain, rivers, trees, animals, little babies and such came from and, when they died, where they went. Imagine trying to explain

the Supermundane World of the Luminaries of Fire, and the Cosmic Energy flows through which they move to basically mindless people.

To this day, Humanity remains pretty much form focused and thus incapable of accepting the existence of the Supermundane, and we are still saddled with these ancient thoughtforms. This rather astonishing fact is an indicator of how far we have not come and how far we have to go. This human, by this time instinctual, that is thoughtless and knee jerk, fixation on form reality/existence and especially on the particular ancient thoughtform which posits the superiority of men over women and all things female including, kindness, compassion, gentleness, care, empathy, is a major cause of much of what is not working on the Planet according to the Plan.

We continue to refer to the Intentional, Positive, Impulsing energy of

Cosmos as "masculine" and the Receptive, Negative, Creating energy of Cosmos as "Feminine". In so doing, we play into the huge cloud of strictly human generated anthropomorphic assumptions, connotations, and glammers which surround the illusory concepts of masculine superiority and feminine inferiority. The fact is that the qualities associated with Intentional, Positive, Impulsing energy and Receptive,

Negative, Creating energy have nothing to do with the gender of a human being.

Masculine superiority and feminine inferiority, two grossly manipulated and warped thoughtforms, lie at the root of the Great Illusion of Separation. They are a basic part of that eons ago "planned distortion of the divine will ... intelligently created by [the Retrogressors]" *The Rays and the Initiations* p. 350

**And so, we are proclaiming that 2014 will be the Year of the Mother.** We desperately need to be conscious of, embody and use the energy of Goodwill as we move toward the 2025 Conclave of the Hierarchy. July 2013 through 2014 is the creative or implementation cycle for the energies which came into the Planet at the Peak alignment of the 3,9 and 27 year Solar Energy Wave cycles in 2012.

***Masculine superiority and feminine inferiority, two grossly manipulated and warped thoughtforms, lie at the root of the Great Illusion of Separation.***

Capricorn of 2014 initiates this cycle. And, this starts the approach to

the annual Hierarchal Conclave for 2025. In 2001, the year of the Great Decision for those Hierarchs taking the 6th Initiation, the World Service Intergroup held a Conclave in Darjeeling India and produced a document entitled The Darjeeling Declaration. "This Declaration is a summary of impressions received in meditation at the World Service Intergroup conclave by forty representatives of spiritual groups from around the world during a meditation retreat held in

Darjeeling, India during the five day Wesak full moon period, May 4-9, 2001 Conclave of 200. The Preamble of that Declaration reads as follows:

## **The Great Decision**

The Great Decision for humanity is whether it will tread the lighted Way and choose to throw off the shackles of all that binds it to the lower realms and liberate itself into the freedom of the Spirit. The Decision of the Arhats is to provide the energy to humanity to make this possible despite whatever upheavals and destruction this may cause in humanity. For destruction of the form is preferable to the death of the spirit and the living death of souls in bondage. **Power will flow to all that liberates humanity from its chains and power will be removed from all that enslaves the Spirit. The time has come for humanity to be free.**

The Externalization and Reappearance is beginning now and the true government, led by disciples and initiates, will be in place by 2025.

Given what has unfolded since 2001. These are at the least very interesting words. They shed some significant light on the upcoming cycles. 2014 happens to be what is called a midterm election cycle in the United States. This election is enormously important in terms of the following Presidential elections of 2016, 2020 2024 leading into the annual Hierarchal Conclave of 2025.

With the power of the Mother working though inflamed hearts, we will of course Triumph.

Tom Carney  
Capricorn, 2014
