### Group Meditation Work

September 25, through October 23, 2014

The heart will prompt when it is necessary to rush to the help of one's neighbor. The heart will indicate when to stop short the madness of a fierce animal. It is impossible to express in a word of law just when the necessity of this or that action becomes evident. Unwritten are the laws of the heart, but only therein does justice dwell, for the heart is the bridge of the worlds. The sword of knowledge flashes at the command of the heart. For the heart there will be no contradiction. *Brotherhood, 121*

October 24, through November 21, 2014

"As a man thinketh in his heart, so he is." The lower mind should be the organ of heart expression and be as unconscious in its functioning as is the rhythm of the heart itself—the physical heart. The higher mind is intended to become increasingly the field of the initiate's effort, and hence the constant need for him to build the antahkarana. *The Rays And The Initiations p137*

## The Sovereignty of the One Humanity The Common Good

**C**osmos does not strive to create chaos. The essential Intention of Cosmos is to reveal Truth and Beauty, Harmony and Balance, through an unending diversity of forms in matter. This is what the Ancients mean when they speak of the Music of the Spheres, The Cosmic Dance.

However, one need not look into the wonder of the wheeling constellations in the night skies, to see this. Look in a baby carriage, or at a rose, or an oak leaf, a caterpillar, a spider's web or even the spider. This obvious fact is everywhere to be observed from the structure of atoms to Galaxies.

Unfortunately this fact is, as yet, not that accepted by "modern science" which continues to be locked into the inductive method and engrossed in the study of effects. These facts are not revealed to the Intellect, but only to the Heart.

"Whoever loves flowers is on the heart's path. Whoever knows the striving to the summits is on the heart's path. Whoever thinks purely is on the heart's path. Whoever knows of the highest worlds is on the heart's path. Whoever is ready for Infinity is on the heart's path. Thus shall we summon all hearts to the realization of the Source. It is correct to understand that the substance of the heart belongs to the Subtle and also the Fiery World. One can perceive worlds within the heart, but not within the mind. Thus, wisdom is contrary to intellect, yet it is not forbidden to adorn the mind with wisdom."Heart, 390

For anyone who is not mired in the delusion of materialism, Human History is about the Cosmic Intention of expressing these Truths through the evolution of consciousness, not the forms. As consciousness evolves, humans are ever better able to create manifestations on the dense physical that better reflect those "Images of truth which you call Ideas."This, the poets always knew.

***"Build thee more stately mansions, O my soul,  
As the swift seasons roll!  
Leave thy low-vaulted past!  
Let each new temple, nobler than the last,  
Shut thee from heaven with a dome more vast,  
Till thou at length art free,  
Leaving thine outgrown shell by life's  
unresting sea!"***

***Oliver Wendell Holmes, Sr.***

Evolution on this planet concerns the expanding awareness and growing comprehension of individual human beings concerning Cosmic Intention and what is actually happening on the planet. Freed from the myopic fixation on the dense physical events which are the effects of the exercise of free will decisions by human beings, the path of consciousness evolution becomes startlingly clear.

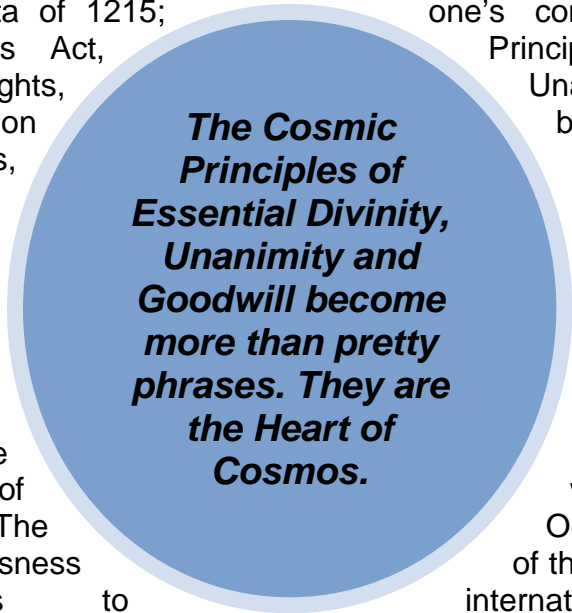

The Cosmic Principles of Essential Divinity, Unanimity and Goodwill become more than pretty phrases. They are the heart of Cosmos.

Micro or macro, human free will choices result in effects that either support the Intention of the Cosmic Way or delay it. Some of the decisions which resulted in effects or outputs that actually support the manifestation of Cosmic Intention: The 800 year old Magna Carta of 1215; The Habeas Corpus Act, 1679; The Bill Of Rights, 1689; The Constitution Of The United States, 1788; the poetry, music, art; the heroes and heroines; the courage and decency of people who love and cherish others; all of these are evidence of the evolution of consciousness. The evolution of consciousness enables humans to progressively, if somewhat slowly, see more deeply and rationally into Cosmic Intention and make choices which will further the manifestation of that Intention in form.

One of the more important and powerful aspects that is revealed by the study of evolution is the movement of human consciousness from the sense of one's self as a separate individual, identified with one's separate physical form, to an awareness of one's essential sameness and unification with "others". The above cited events were all caused by, or the effects of a free will action by an individual or a group of human beings acting in accordance with this partially realized Cosmic Fact.

Expanding consciousness through the human form moves from the ages old point

of a dense physical separated identification to a multidimensional, energy focused identification with the greater whole. At first, this realization includes other humans, but eventually it expands to include all of Life. The Cosmic Truth of Brotherhood unfolds in one's consciousness. The Cosmic Principles of Essential Divinity, Unanimity and Goodwill become more than pretty phrases. They are the Heart of Cosmos.

The most recent attempt by those in the One Humanity to expand this growing comprehension of the fact of a multidimensional Reality in which all are equal was the October of 1945 manifestation of the United Nations to promote international cooperation. The UN was to replace the not successful League of Nations established in January of 1920 to maintain World Peace.

The effort to manifest a United Nations is experiencing the same kind of resistance that every effort to expand the inclusive reality of group consciousness has encountered since the beginning. However Cosmic Physics ultimately prevails as we did when we finally were able to take that huge step into the future in 1788. Recall, please, that Constitution was seriously flawed, as is the United Nations Charter.

The flaw in the UN Charter, while differing in some respects is basically the same as the flaw in the 1788 Constitution. Individual States would not sign the Constitution unless they had the compromise that allowed slavery as an institution to remain in

the document. The use of the “veto” by anyone of the five principle members of the Security Council, pretty much makes the UN ineffective in any really significant way.

After some 80 years, the slavery compromise was finally removed from the Constitution by the 13<sup>th</sup> and 14<sup>th</sup> Amendments. However, Slavery was not the only problem with the U.S. Constitution. Since its original signing, the Constitution has been amended 27 times, and it is still far from perfect. It is, however, much better than no Constitution.

Ultimately, the resistance of the Forces of Retrogression only serves to cause those who seek equality and freedom for all to strive that much harder. You may see this as “harmony through conflict” and it is. It is the Intention of Cosmos working through the harmony of Cosmic Physics which, for lack of a more “scientific” term we name the energies of Will, Love, and Intelligence, which are ultimately undeniable.

The planet is presently on the edge of a crevasse. We can either leap it or fall into it. Halfway measures always fail and result in a fall, and always require later “fixing” at great cost, the cost of the United States Civil war for example. The United States would not be in existence now if the “sovereignty” of each State were allowed to act beyond or above the Law of the Common Good of the Whole Nation.

Why it is difficult for our leaders to see this, is beyond understanding. If we want to avoid destruction of the people and the planet on levels unimaginable, we have to come together as One Humanity that places sovereignty of the Common Good of all people and indeed of the Planet above the

sovereignty of any Nation. This of course means that the UN Charter needs to be amended to eliminate the ability of any one of the five principle nation on the Security Council to veto the will of the majority of the Council.

This is a truly daunting task. But relatively speaking, no more than that which we faced in the signing and eventual “fixing” of the Constitution. This October the UN will be 70 years old. It took 75 years from the signing to the “fixing” of the Constitution. Overall the Constitution has so far been amended 27 times. There are many other aspects of the Constitution and the UN Charter that need to be worked out, and over time, they will be.

I know it sounds like a trite saying, but the phrase “where there is a will there is a way” is actually a basic statement of the fact and power of Cosmic Physics. We have heard the call. It is time to act!

***Shield and lance! God has blessed the warriors.***

***All will come. Twilight will end. Do you not see that the Cosmic Consciousness is in convulsion?***

***We know the course of the battle. The Plan of the Creator cannot be altered. From the Beginning the dark ones struggled. From the Beginning We conquered. The Call #231***
