COMMUNITY MEDITATION MEETINGS

Aries, Tuesday March 22, 2016 @ 7:45

Taurus, Thursday April 21, 2016 @ 7:45 PM

In this Issue

Reconstructing The Planet

by Tom Carney

Online Workshops/Classes (Please call 310-545-0910 to arrange participation)

- Building the Lighted Way - Sundays @ 9:00-11:00 AM Pacific Time
- Monday Evening Workshop @ 7:00-9:00 PM EASTERN TIME
NATURE OF THE SOUL Please email arcanaworkshops@gmail.com
- White Magician Training - Wednesday Evenings @ 7:00-9:00 PM Pacific Time

Online New and Full Moon Group Meditations

(To sign up for notices, e-mail arcanaworkshops@gmail.com)

Group Meditation Work
March 8, through April 7, 2016
Fire
April 8, through May 6, 2016

Reconstructing The Planet

“The Power of the disciple of Synthesis is the Power of Divine Purpose synthesized with human need.” Ashramic Projections P170

Individuals who are consciously aware of the fact of the interrelated reality of our multidimensional Cosmos are relatively free of the myopic one dimensional illusion of materialism. This highly restrictive, one dimensional assumption literally blinds most of our brothers and sisters to the greater Reality and imprisons them in the Dimension of Effects. Thus, constantly dealing with immediate effects, their “heads buried in the sand”, they are basically ignorant, even to the point of denying the existence, of the occurring and impending disasters which confront Humanity on this planet

We see. We are in fact immersed in the beauty and power of the Great Unfolding Plan.

The point of view of an expanded, inclusive consciousness reveals the Whole picture. We see. We are in fact immersed in the beauty and power of the Great Unfolding Plan. Simultaneously we are also acutely aware of the dangers inherent in the present chaotic and destructive conditions raging on the Planet. We know that the situation is dire and worsening. This item from a recent issue of the NYT is one of many possible examples. *“The Republic of South Sudan is not even five years old, but already 50,000 people have been killed in an ethnically driven civil war.” NYT March 12, 2016*

We understand that the Planet is evolving into a New Age. What is not so well recognized is that the creative impulses of this New Age are vastly different than those from which the old world was created or fashioned. These new frequencies are bringing enormous change into manifestation. The changes are occurring now throughout the planet in the invisible dimensions of thoughtforms and emotions, and are manifesting in the Dimension of Effects which we call the “dense physical plane”.

This is not anything new to our planet. It is how the Plan unfolds or moves into form manifestation. As

examples of the kind of change engendered by the introduction of new frequencies to a system, we can cite the disappearance of the dinosaurs, or the appearance of the Agnishvattas or the destruction of Old Atlantis. This kind of change is what constitutes Evolution.

Such changes have already occurred within the context of the Future (a place in consciousness, not in time), the higher dimensions of the Plan. So, significant change in the old age Piscean system (that is evolutionary development not revolutionary or horizontal motions of forms), has been happening for some

hundreds of years and is only increasing in power and speed.

Evolutionary change means that entire old age designed systems on the planet are going to be reconstructed so that they vibrate in harmony with the frequencies of this incoming tsunami of Light. And, it is precisely because of this FACT that we absolutely need to be very concerned with the specters of human caused climate change, starvation, refugees, huge political upheavals, and corruption in virtually every nation. We very much need to pay attention to these facts.

Destruction is an unavoidable aspect of reconstruction; however, the level of destruction depends very much on how well we, the souls who incarnated at this time to serve in this fashion, perform our given task of salvation. If we play our part in the Plan of the Great Ones, we can help facilitate the unavoidable changes so that there is a flow of harmony between the reconstruction and the necessary destruction and clearing away of the debris of the old forms with as little suffering and pain as possible.

It is the movement of these changes from the higher dimensions of Idea and Principle, where they are already facts, through our lower mental and emotional planes into the manifestations of new forms that presents us with the present opportunities. It is on these two lower

dimensions that the actual war for the future of the Planet is raging. It is the results of this struggle that appear as the effects that we see hourly in our media.

And it is on these two dimensions, the emotional and mental, that we can best serve the Forces of Light in this crucial struggle with the Forces of Retrogression or the Dark Forces.

We are conscious of being conscious. Many of us are relatively well trained in “meditation” or the processes which have been called Magic but which are actually the science of consciously willful direction of energy into forms. That the Forces of Retrogression are

equally well trained in these processes is true. The difference lies in the source of the motivation which directs the will.

Realizing that all events are the results of consciously, or in many cases unconsciously, driven thoughts we can help to consciously create conditions and environments that greatly reduce anger, fear, and competition and introduce cooperation and mutual respect.

The time we have to enable the incoming changes to move through the planet with a minimum of destruction has grown very short. As Master D. K. pointed around August of 1946 “...certain plans which were slated...to take place several centuries later than this but which—owing to the unexpected preparedness of humanity—can take place, not prematurely really, but securely and in the

Evolutionary change means that entire old age designed systems on the planet are going to be reconstructed so that they vibrate in harmony with the frequencies of this incoming tsunami of Light.

fullness of time; this fullness of time, as regards the particular planning with which we are dealing, is from now until the year 2025 A.D.—a brief period of time indeed in which to see the consummation of the larger purpose of the planetary Logos, working through the three major centers within His body of manifestation.”

Externalization of the Hierarchy P.562

We are in the last decade of what D.K. has called “The Stage of the Forerunner” which has been going on for more than 75 years.” 2025 is the end date. This date, which is the year that the Hierarchy meets in Conclave, will begin the next 100-year cycle.

In the past 20 years or so, we have been witnessing changes of a magnitude in many areas of Planetary Life that we can hardly credit with reason.

Between now, 2016 and 2025, that process is going to accelerate also more than we can imagine. But this is precisely what occurs when, after several hundreds of years of building, the critical mass for change is reached. If one can imagine the whole picture, and realize that in terms of time 15 or 20 years is the blink of an eye, the change is not unlike an atomic explosion.

These changes, as noted above, are already underway on the emotional and mental planes. The inbreathing cycle for this 2016-2017 round starts when the sun moves into Aries on March 19. This inaugurates the 2016 Three Linked Festivals of Spring. The importance of our work during these festivals cannot be

overestimated. Our goal, as always in the Three Linked Festivals, will be to bring the synthesized efforts of all of the work done throughout the planet in Aries and Taurus through the pillars of Life and into Cancer, the door into dense form, to “help Humanity to build a lighted house and therein dwell”.

As noted by Master D.K. “Work is done by action, not by talking” **Discipleship in the New Age 1 P.590**. Out of ancient habit we tend to think of “action” as the activities in which we engage on the dense physical plane. We think of the 7th Ray as a “grounding” energy and we think of “grounding” as putting a thing in some sort of dense form.

This is all good, of course, but the real work is done on the emotional and mental planes. What we

tend to forget is that from the standpoint of Fire or Energy, we live in the Cosmic Physical Dimension. So “grounding” is very relative. Using the science of energy attraction and direction, what we call meditation, we “ground” Ideas and Principles in the matter of the lower mental and emotional planes.

Because energy follows thought, our concerns and our focused efforts need first to be consciously, that is deliberately, “grounded” in these dimensions. Grounded there, they will unavoidably manifest as effects in the lower three sub planes or the dense physical. Further, the effects that this conscious grounding generates will be in harmony with the specific evolutionary needs of the

Using the science of energy attraction and direction, what we call meditation, we “ground” Ideas and Principles in the matter of the lower mental and emotional planes.

Aries 2015

environment in which they manifest. This will happen as a result of these efforts being sourced from Principle as compared to an attempt to update the older outworn effects which already carry the seeds of their eventual failure. It is so, that no one size fits all, and out of the pure energy of the Idea, the heart/soul can fashion a garment that will fit the specific need.

It would be a helpful thing for groups of conscious individuals living and working in various areas of the Planet to create multitudes of these kinds of conscious energy attraction and direction groups working on specific issues, systems or areas of policy. The frequency of such groups would guide the incoming energies into effective upgrades, upgrades on the Principle level that would result in actual evolution.

An Example of this kind of work is appended to the end of this *Thoughtline*. The general outline of this example will work for any selected target.

Master R. has indicated that "Conflict in the extreme, followed by quick evolutionary change will manifest wherever the Synthesis energy is applied."

Ashramic Projections P.174 However, "reconstruction", or the synthesizing of polarities carried out on the mental and emotional planes will result in much more harmonious manifestations and thus much less disruption and pain on the dense physical.

Being very much human beings, we understand the satisfaction and joy of actually doing something like growing flowers or vegetables and eating them or working on building houses for the poor or being a doctor and serving the sick. The thousands of such tasks on the dense physical plane are all good and needed, and we do them with love and gusto.

However, also being very much souls, we can if we are open to it experience the Joy of working on the subtler planes as well. There is something amazing that occurs when a veil of darkness is dissipated and Light pours through. There is a kind of music that spontaneously seems to fill space, and then there is the Fire of Joy. Talk about strolling through a grove of Giant Redwoods!

Out Line for Capitol Cleaning Meditation

Visualize the group participants and then create a group heart by linking heart to heart with the group participants.

Align with the Ashram (MM or a representative), Christ, Shamballa, Heart of the Sun, Central Sun, Sirius or through the Ashram with the Christ, the Planetary Logos, and the Avatar of Synthesis.

Invoke and stand receptive to the Synthesis energy flowing into and down this alignment into the heart of the group.

With an act of the Pure Reasoning Will direct the Synthesis Energy of the group heart through the Statue of Freedom* (**A Woman**) on the top of the US Capitol into the Capitol building, through the dome of the Capitol.

Visualize the Light anchoring in the Capitol Rotunda spreading horizontally in a 360 degree wave that flashes throughout the building moving as Light through any presence of darkness.

Focus again in the group heart and pulse a stream of the Synthesis Energy directly down the same alignment. As the Light enters the Rotunda, see it split into two streams one moving into the chamber of the House of Representatives (left) and the other into US Senate (right).

Within each chamber, see this Light spontaneously form as a sustained, large spherical Sun like field of energy radiating the entire chamber with the energy of Synthesis.

Fix the image in place with Word of Power, The Great Invocation. Know that this Presence will remain radiating in the space.

This process can be done by anyone of the group at anytime. Thus, the group will continue to energize this field every day at various times.

****The image of the Statue of Freedom, or “Freedom Triumphant in War and Peace”, the crown jewel on top of the United States Capitol Building. The helmet design is basically an adapted Roman***

military helmet, with stars across the brow, and an eagle and feathers on top in the umbrella or mohawk style pictured.

What most people don't know is that the helmet design was originally different, and in the 1850s the man in charge of the design approval was none other than Jefferson Davis of Mississippi. Davis would be the eventual president of the Confederacy during the Civil War. The original design was plainly a Roman Liberty Cap, or Phrygian Cap. The [Phrygian Cap](#) is basically a symbol of the pursuit of liberty and freedom, and one of slaves winning that pursuit in ancient Rome. Now, it stands to reason that the eventual leader of the Confederacy would disapprove of such a symbol on the top of the Capitol Dome, but what Jefferson Davis couldn't predict was the outcome of history.

The Statue of Freedom as you see it is a true symbol in American history of liberty. Most of the Capitol and grounds were actually constructed by local slaves, as the appeal for laborers to the task was largely unmet. The Statue itself was cast by a man named Clark Mills, whose right hand man was a fellow named [Philip Reid](#). Reid was himself a slave. And when the foreman of the project went on strike demanding higher wages, it was Philip Reid who oversaw the assembling of the statue. The important historical note here is that in 1862, Abraham Lincoln signed into law an act called Compensated Emancipation, which freed all the slaves in the District of Columbia, Reid included. Approximately 8 months later, Lincoln gave the now famous Emancipation Proclamation, and in December of 1863 the Statue of Freedom was hoisted into place in front of crowds of now free citizens. Following that the Union, or North, would eventually win the Civil War and slavery would be abolished.

What does all this mean? It means a) the Statue of Freedom earned its name, and b) the Eagle feather Mohawk/adapted military helmet is in fact, an American Liberty Cap.
